JACKY JIANG

Elmhurst, NY | jjiang0611@gmail.com | linkedin.com/in/jiang-jacky

Education

STONY BROOK UNIVERSITY (SUNY) Stony Brook, NY

Master of Science, Technological Systems Management (Specialization: Technical Management) December 2025

Advanced Graduate Certificate, Data and Computational Science December 2025

Bachelor of Science, Technological Systems Management (Specialization: Information Systems) May 2024

- Dean's List: Spring 2021, Fall 2022, Spring 2023
- Relevant coursework: Data Structures, Database Design and Practice, Survey of Probability and Statistics, Applied Linear Algebra, Object-Oriented Programming

Technical Skills

Languages: Python, SQL, Java, JavaScript, C++

Data & Visualization: pandas, Matplotlib, Folium (geospatial mapping), Power BI, Excel

Tools: Jupyter, Git, MySQL, tkinter

Experience

MTA, CASEY STENGEL BUS DEPOT Flushing, NY

Intern July 2024 – August 2024

- Automated tracking of about 30 disciplinary files a day using Excel and Python, cutting daily sorting time from 30–60 minutes to about 10 minutes.
- Maintained and updated records for 50+ bus operators across Excel and the internal UTS system to support compliance processes.

Projects

Point-of-Sale System for a Convenience Store Elmhurst, NY

Developer, Independent Project 2024 – Present

- Built a desktop point-of-sale application in Python (tkinter) now in daily use at a convenience store, processing 50–100 transactions a day.
- Implemented transaction management, receipt printing, keyboard shortcuts and auto-decimal price entry to speed up checkout.
- Automated monthly data backups and sales reporting from stored transaction records.

NYC Congestion Pricing Traffic Analysis Stony Brook, NY

Course Project (AMS 561), Stony Brook University March 2025 – May 2025

- Cleaned and aggregated NYC DOT real-time traffic speed data in pandas into daily average speeds for 9 bridge-approach road segments, covering March 2024 – May 2025.
- Converted road-segment coordinates to GeoJSON and built an interactive Folium map with a daily time slider, color-coding speeds to compare traffic before and after the January 2025 launch of congestion pricing.
- Plotted per-segment speed trends in Matplotlib and presented findings with policy recommendations for urban transportation planning.

Research

STONY BROOK UNIVERSITY Stony Brook, NY

Researcher, Healthcare Data Interoperability (Advisor: Prof. Eduardo Palacio) January 2025 – December 2025

- Evaluated the HL7 and FHIR interoperability standards to assess how standardized data exchange affects care coordination and system efficiency.
- Analyzed technical, regulatory and implementation barriers to health data sharing and proposed scalable integration strategies.
